

PRESS RELEASE

28th November 2022

Helexia signs 15 MW of commercial contracts to supply new customers with green energy in Brazil

Helexia, a subsidiary of Voltalia (Euronext Paris, ISIN code: FR0011995588) and an international player in the energy transition, announces the signature of three new contracts in Brazil totalling 14.7 megawatts to supply TIM (8.5 megawatts), Vibra Energia (4.0 megawatts) and Raia Drogasil (2.2 megawatts) with solar power.

Helexia is pleased to assist the following major Brazilian companies in their decarbonisation journey:

- **TIM:** A Brazilian telecommunications company and subsidiary of Italy's TIM S.p.A., which provides mobile and fixed telephone services and is the third largest telecom operator in the country;
- **Vibra Energia:** The largest distributor and marketer of petroleum derivatives and biofuels in Brazil with more than 8,000 gas stations across the country; and
- **Raia Drogasil:** The largest drugstore company in Brazil by revenue and market capitalization, operating 2,500 stores branded as Droga Raia, Drogasil, 4Bio, and 11 distribution centers.

The contracts provide for solar power supply of approximately 1,000 clients' consumption sites located in the Brazilian states of Rondônia, Rio Grande do Norte, São Paulo and Mato Grosso do Sul.

Together with the 87-megawatt contract with Telefonica / Vivo signed in 2020-21, Helexia now owns a portfolio of 101.7 megawatts of solar projects under construction in Brazil.

"With these new contracts, Helexia demonstrates its capacity to diversify its client and sector base (telecom, energy and pharmaceuticals) and builds on its track record with Telefonica / Vivo, its first client in Brazil. The new contracts will lead to economies of scale in the country", says Aurélien Maudonnet, Helexia Brazil Country Director.

"Helexia Brazil is growing fast. Thanks to the hard work of our local team, we will continue to support clients in various sectors in their commitment to decarbonisation", says Benjamin Simonis, CEO of Helexia.

About Helexia (<https://www.helexia.group/>)

Helexia is a key player in the energy transition sector.

Founded in 2010, Helexia, a subsidiary of Voltalia (ISIN code Euronext Paris: FR0011995588), specializes in the energy performance of buildings and the production of photovoltaic energy on-site (on roofs and solar carports).

With more than 350 employees spread over 8 countries, Helexia has completed more than 350 photovoltaic projects representing 104 MW installed. Helexia supports its commercial and industrial clients in more than 180 energy efficiency projects and manages 1000 sites each year.

Helexia offers a wide range of services, from strategy definition to construction, implementation, monitoring, and maintenance of equipment.
